BOXX Cloud

Powered by performance tuned BOXX workstations, BOXX Cloud (BC) provides dedicated (non-virtualized) workstations in a highly scalable and secure datacenter. A flexible subscription model, our service allows your enterprise to extend your data center without facing the complexities and upfront cost of building an on-premise private cloud. BC also delivers the highest cloud performance for Autodesk Revit, SOLIDWORKS, and other professional applications.

Supported Industry Segments:

Architecture, Engineering, & Construction

Manufacturing & Product Design

Key Features:

• High performance cloud workstations that boost performance vs traditional cloud hosted environments

• Supports corporate network and work-at-home or work remote users

• PCoIP® Remote Graphics Protocol delivering high performance across any network link

• Professional, dedicated NVIDIA® RTX GPUs with support for RTX ray tracing and CUDA

• Low latency high performance remote graphics with PCoIP

Regional Datacenters

• Hosted from regional datacenters to ensure best performance and lowest latency.

Support

• Technical support offered with included standard business hours phone support in base support plan. Enhanced support plans featuring extended hours optionally available.

2X Higher Performance vs Other Cloud Offerings

Benefits

• Unparalleled performance from performance tuned BOXX workstations

• Seamless connectivity from any device, including less capable desktop PCs, laptops, tablets, etc.

• Faster access to cloud data from your remote workstation due to high speed interconnects between remote workstation and data

• Complete control of your data for security, backup, and disaster recovery, as well as the flexibility to use distributed and cloud-based storage solutions

Why BOXX Cloud?

• Only BOXX can deliver desktop performance to the cloud optimized for CAD application performance

• Low latency high performance remote graphics with PCoIP, provides a user experience similar to a local desktop or notebook

• BOXX understands the needs of professional workstation applications, with multi decades of experience deploying 1000's of customers worldwide, now providing our expertise for cloud hosted workstations

• Less complexity and faster onboarding eliminates the learning of complex cloud service provider tools and extensive re-training of teams. Utilize your existing desktop IT resources to roll out users quickly.
