# FLEXX

FLEXX is a datacenter ready server and workstation product line that delivers unrivaled performance for professional digital content creation workloads. FLEXX's innovative design facilitates the deployment of configurations never before possible in the datacenter, while providing both flexibility and scalability.
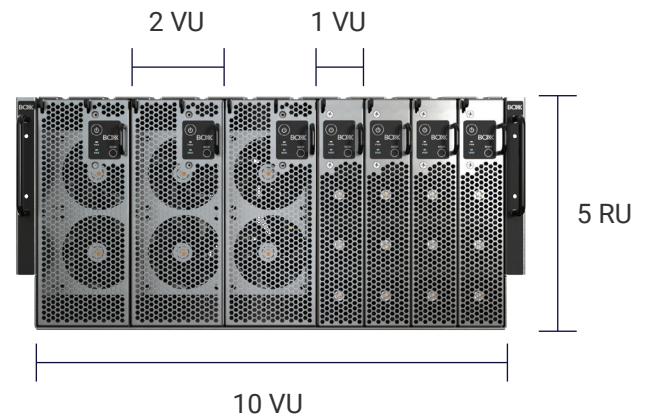

Enclosure

1 VU
FLEXX Module

2 VU
FLEXX Module

2 VU   1 VU

5 RU

10 VU

Each enclosure is 5 Rack Units tall and supports 10 VU for system modules. A VU is a "Vertical Unit". System modules come in 1 and 2 VU sizes. Enclosures may be populated heterogeneously with different system modules. Mix and match nodes for any combination of workstation nodes that best suits your workflow.

Enclosure Power

(4) Power Supply Modules
N+1 Redundancy
~5,400 Watts @ 208V
~540Watts per 1 VU

Module Power:
2000W @ 230-240V
1800W @ 200-220V
1000W @ 100-120V
