

Virtual Studio Solution

APEX T4 PRO features AMD Ryzen™ Threadripper™ PRO 7000 Series processors for the most demanding workloads.

- Rack mountable, liquid cooled, multi-threaded performance with up to 96 cores and 2 TB of system memory.
- Up to 4 professional grade GPUs and multiple PCIe slots enable Unreal Engine, video I/O cards, high speed networking, high speed storage adapters, SSD or Sync II cards.
- Fully virtualized streaming complies with stringent SMPTE ST 2110-21 timing and traffic flow requirements while Rivermax with GPUDirect supports 8 streams of UHD 2160p60 with one CPU core.
- PAC Storage **NVMe** cost effective storage with outstanding I/O performance: up to 900K IOPS performance for intensive workloads and flexibility of Automated Storage Tier-ing.
